

3 Divisions and 14 Labs to Lead Academic Research

Next-generation SR

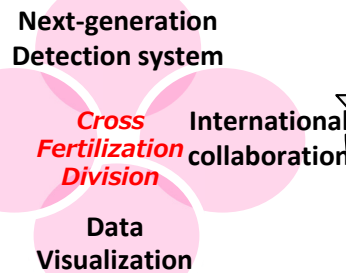

R&D to foster links between next-generation measurement engineering and SR science

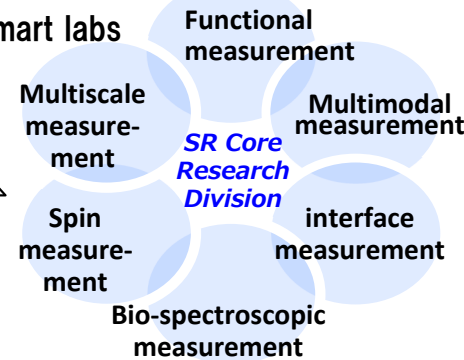

R&D for next-generation measurement engineering

Promoting of cooperation with the society and fusion of scientific/technologic fields

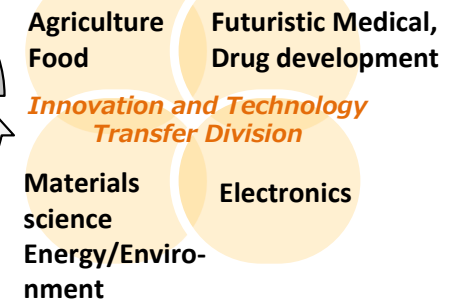

4 Smart labs

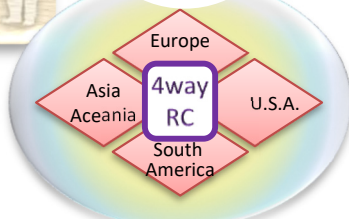

6 Smart labs

4 Smart labs

Super computer MASAMUNE

4 way research complex plan

Leading academic research

from scientific evidence based support for ES design to promotion for creating value by academic/industry collaboration
